Bell Fibe began operation in June, 2010 in Toronto, followed by Montreal. As an IPTV service, it was the second attempt by Bell to enter into urban areas where most residential businesses would not allow satellite dashes. The lineup is similar to Bell TV except it can have more local variations for carrying broadcast signals. The bandwidth allows for more HD channels. Over the years, some channel numbers have drifted apart and a larger number of HD and ethnic channels distinguishes this service from the Bell TV satellite service as the service has expanded throughout Ontario and Quebec and is now available from Windsor in the West to Quebec City in the East. This lineup is an overview which does not list specific local channels which requires checking the local lineup for details. Channels are either listed across the entire Fibe platform or are specific to Ontario or Quebec. (Since Gatineau is under the Ottawa system, it counts as Ontario for the list. Time-shifting channel options are listed.

```
 Eastern US Network feeds vary by region:  Windsor-London: Detroit  GTA/Golden Horseshoe/Hamilton-Niagara; Buffalo  Kingston: Buffalo (except PBS-Watertown)  Ottawa: Detroit (except PBS-Watertown)  Quebec: Burlington, VT-Plattsburgh, NY
```

American Television stations are subject to Simultaneous substitution. Some US cable networks provide alternate programming to Canada in place of programming that they don't have rights to show in Canada.

Future and upcoming lineup changes

Bell Fibe

Bell Fibe began operation in June, 2010 in Toronto, followed by Montreal. As an IPTV service, it was the second attempt by Bell to enter into urban areas where most residential businesses would not allow satellite dashes. The lineup is similar to Bell TV except it can have more local variations for carrying broadcast signals. The bandwidth allows for more HD channels. Over the years, some channel numbers have drifted apart and a larger number of HD and ethnic channels distinguishes this service from the Bell TV satellite service as the service has expanded throughout Ontario and Quebec and is now available from Windsor in the West to Quebec City in the East. This lineup is an overview which does not list specific local channels which requires checking the local lineup for details. Channels are either listed across the entire Fibe platform or are specific to Ontario or Quebec. (Since Gatineau is under the Ottawa system, it counts as Ontario for the list. Time-shifting channel options are listed.

```
 Eastern US Network feeds vary by region:  Windsor-London: Detroit  GTA/Golden Horseshoe/Hamilton-Niagara; Buffalo  Kingston: Buffalo (except PBS-Watertown)  Ottawa: Detroit (except PBS-Watertown)  Quebec: Burlington, VT-Plattsburgh, NY
```

American Television stations are subject to Simultaneous substitution. Some US cable networks provide alternate programming to Canada in place of programming that they don't have rights to show in Canada.

December

Channel #	Network	Notes Note: On December 1st, 2006, Dish Network was required under Federal Court Order to end distant

		network service due to a lawsuit by CBS and Fox which argued multiple violations of SHVA by selling distant networks to customers who were ineligible. This ruling did not effect distribution of PBS or Superstations, but distant network service was ended and channels were only available as locals in their respective home markets. National Program Service which also sold to c-band customers bought transponder service and started their own distant network service to Dish customers which had to meet very strict criteria. The New York and LA networks were initially replaced with Atlanta and San Francisco networks and NPS sold distant networks to Dish Customers until February 25, 2014 when the service was ended by NPS.

List of Sirius XM Radio channels

Since 2008, **Sirius XM Radio** has had a similar channel lineup, with a few differences based on whether the individual has a Sirius Satellite Radio or an XM Satellite Radio. Although the two services merged in 2007, for technical and legal reasons separate radios continue to be manufactured for the separate services despite the programming lineups having merged.

The following is a list of channels on Sirius XM and Sirius XM Canada. There are a total of 151 full-time channels on Sirius XM, 130 of which are on Sirius XM Canada. Not included are channels that are specifically used for live sports programming, as well as former music channels that were merged with a duplicate music channel after the merger.

Vivid Radio	Sex talk	U.S. only

Notes[edit]

Most internet channels can be "personalized" through a menu of sliders referring to specific elements which can be adjusted. This does not apply to such stations as the "party" stations.

For example, Classic Vinyl can be adjusted as such:

- Classic hits (plays classic rock hits from the sixties to seventies) versus depth (plays lesser-known tracks)
- Earlier (sixties) versus later (seventies) Vinyl
- The amount of British artists on the station

Also available is the ability to have the station only play music without interruptions.

Channels canceled before launch[edit]

- XM announced in April 2006 that in late spring/early summer six regional News & Talk channels (XM 134-XM 139) would be added and provide regional news coverage for every area of the continental US. These channels were to have been provided by Clear Channel Communications and were to have been located in "Regional News, Talk & Music Channels." According to Jon Zellner via a subscriber email, Clear Channel decided to forego the launch of these channels.[3]The original plan was to create a set of regionalized, five-minute newscasts. Each newscast was to carry 90 seconds of advertising, with the 3:30-minute balance devoted to regionally targeted news.

The channels were to be titled:

-
- **Northeast News and Talk**
- **Southeast News and Talk**

- **Midwest News and Talk**
- **Middle America News and Talk**
- **Southwest News and Talk**
- **Northwest News and Talk**

Channels of unknown status[edit]

- XM Announced on 1/31/06 that they would be adding Traffic & Weather channels for Cincinnati, Cleveland, Denver-Boulder, Milwaukee-Racine, Portland, Providence-Warwick-Pawtucket, Sacramento, San Antonio and Wilmington, DE to their NavTraffic product during the first quarter 2006.[4] Rumors that a Traffic & Weather station could be dropped for Cincinnati due to the addition of WLW on XM channel 173 were unfounded as WLW was dropped from the XM service in 2009.

Seasonal/holiday channels[edit]

These channels are season- and holiday-based, and are only around for a part of the year. It is not uncommon that they take the place of an existing channel. As of 2014, Sirius XM has reduced the periods that some of the holiday channels run for the 2014 season with only Holly and Holiday Traditions running for the full season (day after Thanksgiving to day after Christmas.)

- **Holly** - Holly is one of Sirius XM's annual month-long Christmas music channels that plays Christmas songs with an emphasis on up and coming singers. Its playlist changes from what one would find on an FM Adult Contemporary station at Christmas time to what one would find on a station aimed at tweens and teens.

- **Holiday Traditions** - Holiday Traditions is not a traditional Christmas channel per se, but instead is narrowly focused on seasonal pop recordings from the 1940s to the 1960s.

- **Holiday Pops** - This holiday channel plays choral and orchestral music with a Christmas theme. It replaces Sirius XM Pops in December and is therefore presented in XM HD Surround. Formerly known as "Pops Holiday Classics" (2005) and "A Classical Christmas" (2006–07). In summer 2014 the Sirius XM Pops station was discontinued and Holiday Pops will air during a reduced period, only during Christmas Eve and Christmas Day (December 24/25 - before the Sirius XM pops station was cancelled it operated during the bulk of December.)

- **Country Christmas** - This channel features Christmas-themed country music. It previously aired on XM as "A Nashville Christmas" (2005) and "Music City Holiday" (2006–07).

- **Radio Hanukkah** - This channel was debuted in 2006 for the Hanukkah celebration. Radio Hanukkah features the best in Jewish music, comedy, Broadway, talk and kids programming. This was the first satellite radio channel dedicated exclusively to Jewish culture. Following the merger with Sirius, Radio Hanukkah produced almost exclusively Jewish music selections, foregoing the comedy, Broadway, talk, and kids programming.

The following seasonal channels also aired on XM in past years.

- **Special XMas** - From 2001-07, this seasonal incarnation of the defunct Special X channel featured novelty holiday music, from songs by the likes of Alvin and the Chipmunks and Barney, to parody songs from Bob Rivers and Weird Al Yankovic, to the more grown-up xL tastes from punk rock bands. Special XMas also aired online and on DirecTV.

- **Bing Crosby Christmas Radio** - Airing in 2008 and 2009 and hosted by members of the Crosby family, this channel featured more than twenty years of vintage Crosby radio specials.

XM on AOL Radio[edit]

On 2008-04-30, the XM channels were no longer offered on AOL Radio,[5] as AOL switched to CBS Radio for some of its content, thus ending a partnership between AOL and XM.

List of Music Choice channels

From Wikipedia, the free encyclopedia

Music Choice (abbreviated as **MC**) is an American company that programs music and produces music-related content for digital cable television, mobile phone and cable modem users in the United States. Music Choice programs dozens of audio music channels for digital cable subscribers, as well as programs and produces music-related content for on-demand customers with access to Music Choice

On-Demand. Music Choice also offers video and audio music programming for cell phone customers through Sprint and AT&T. Music Choice's interactive music video network, SWRV, was started in February 2010 and rebranded in 2013 to Music Choice Play.

Many digital cable and telco companies carry Music Choice, including Comcast, Time Warner Cable, Charter Communications, Cablevision, Cox Communications, Verizon FiOS, AT&T U-verse, Grande Communications, Service Electric Cable TV, CenturyLink, and Bright House Networks. Other companies offer similar audio services for commercial customers, such as Muzak, DMX and Stingray Music.

The following is a list of all of the music streaming channels that exist from Music Choice, an American company that programs music and produces music-related content for digital cable television, mobile phone and cable modem users in the United States. Music Choice (formerly known as **Digital Cable Radio**) was the first digital audio broadcast service in the world and, under its founder and CEO David Del Beccaro,[1][2] launched in test markets circa 1987.

As of 2014, Music Choice offers 52 linear channels: one video channel, Music Choice Play; 50 audio-with-slideshow channels; and one audio-only channel, Taste of Italy. The first and last are only available in a few limited areas.[3]

All of Music Choice's audio music channels provide continuous music streaming with no talk, commercials or bumpers.[4][5][5] Music Choice offers various streams across multiple genres, with each devoted to a particular genre. While a song is playing, artist, song and album or mixtape information appears on screen as well as trivia facts, artist pictures and generic graphics relevant to that particular channel. It also changes old artist photos to new photos.[4][6] Music Choice has an editorial staff that checks facts and finds images to provide for artists.[7] Music Choice programmers select the music based on current charts, music trends, sales, what they feel is hot in the industry and feedback from viewers.[7] All of Music Choice's channels play versions without explicit language except for Rap, Metal, Alternative, Rock Hits, Dance/EDM, Indie, and Adult Alternative.[7]

After each song, the screen design will rotate to prevent burn-in on television screens.[4] Banner advertisements are displayed on every music channel in lieu of commercials, programmed by individual providers at the headend level via local insertion.[5][5][7] Music Choice does not offer any spoken word programming; an unrelated service, the CRN Digital Talk Radio Networks, provides a complementary slate of talk radio channels to cable providers. Music Choice has been found as of 2013 to be the fourth highest-ranking channel in Nielsen ratings based in the 12-34-year-old demographic.[8]
